ACHUKATLA ABDUL AZEEZ

Software Developer | Java Backend | Spring Boot

Hyderabad, Telangana, India | itsazeezwork@gmail.com | +91 7989284581

GitHub: github.com/azeezazeez | LinkedIn: linkedin.com/in/azeezazeez | Portfolio: abdul-azeez.vercel.app

Professional Summary

Backend-focused Java developer who designed and deployed two full-stack applications, an AI chat platform and an e-commerce app, with 55+ REST APIs built on Spring Boot, PostgreSQL, and React. Reduced API response time by 30% with Redis caching during a six-month internship at V Cube Software Solutions. Skilled in secure authentication and authorization (session-based, JWT, OAuth 2.0, RBAC, email OTP), ORM-based data access, caching, Docker, CI/CD, and LLM API integration.

Technical Skills

- **Languages:** Java, SQL, JavaScript, TypeScript, HTML, CSS
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate (ORM), Spring Session, RESTful APIs, JSON, JWT, OAuth 2.0, RBAC
- **Databases and Caching:** PostgreSQL, MySQL, Redis, Query Optimization, Caching
- **Frontend:** React, TypeScript, JavaScript
- **AI and Integration:** Groq API, Google Gemini API, Retrieval-Augmented Generation (RAG), OpenAPI, Swagger
- **DevOps and Tools:** Docker, GitHub Actions, CI/CD, Git, GitHub, Postman
- **Core Concepts:** Object-Oriented Programming (OOP), Collections, Streams, Multithreading, Exception Handling, Input Validation, Layered Architecture, API Design, API Documentation, Session Management, Debugging, Agile

Work Experience

Java Developer Intern **Aug 2025 – Feb 2026**

V Cube Software Solutions, Hyderabad, Telangana

- Developed 50+ REST APIs using Java, Spring Boot, and Spring Security, with authentication, role-based authorization, and request validation.
- Built the data layer with JPA, Hibernate, and PostgreSQL, and optimized queries to improve performance.
- Implemented Redis caching, reducing API response time by 30%.
- Debugged and resolved backend and API defects using Postman, improving service reliability.
- Documented APIs with Swagger/OpenAPI and supported Docker-based deployments through GitHub Actions CI/CD pipelines.

Projects

Twinkle: Multi-Model AI Platform

Java, Spring Boot, Spring Session, Redis, PostgreSQL, React, TypeScript, Groq API, Google Gemini API, RAG

GitHub: github.com/azeezazeez/Twinkle-AI | Live: twinkleai.vercel.app

- Designed and deployed a full-stack AI chatbot with HTTP session-based authentication, Redis-backed session management, email OTP verification, Google OAuth, and password recovery.
- Built 25+ REST APIs for authentication, chat sessions, conversation history, AI model selection, chat search, file uploads, profile analytics, and real-time Live Talk.
- Integrated Groq and Google Gemini APIs to support multi-model chat, using Retrieval-Augmented Generation (RAG).

Zyphora: E-Commerce Full-Stack Web Application

Java, Spring Boot, Spring Security, JWT, PostgreSQL, React, TypeScript, Docker

GitHub: github.com/azeezazeez/Zyphora-Ecommerce | Live: zyphora-cart.vercel.app

- Developed a full-stack e-commerce application with JWT authentication, role-based authorization, email OTP verification, and secure password management.
- Built 30+ REST APIs for authentication, products, cart, wishlist, orders, customer management, and admin operations, with validation, exception handling, and PostgreSQL persistence.

Education

B.Tech, Electronics and Communication Engineering (ECE) **2022 – 2025**

Vaagdevi Institute of Technology and Science CGPA: 7.7/10

Certification

Java Full Stack Development | V Cube Software Solutions
